Resum's show has been to Lancaster and good. It appeared here under the most favorable circumstances and was successful in drawing a transactions erowd of people to the city. At the afternoon performance the test, which by the way is a very large one, was packed, every sent being taken. In the evening the crowd was not so large, but the test was almost filled. The performances were nearly the same except that in the evening the performance was cut to some extent as it usually is. The abov was very good throughout and people were not disappointed. There were three in ge tents. The first, at the entrance, contained the herds of elephants the entrance, contained the herds of elephants and camels, ascred cattle, &t. In the second was the menageric. The display of animals was very large, and they all were in good condition. Among other attractions in this tent were King Thebaw's hairy family Maphoon, the mother and Young Phoset, her son. They really are great curiosities. In the circus tent two arge rings and an elevated stage are used for exhibition purposes. In each a performpossible for the audience to watch every-thing with any satisfaction. In this particular the show gives more than the gorth of the money, and most of the circus loving people would rather go back to the good old days of one ring. The circus company which Barnum has is of course very large, and it included many of the best-known people in the business. The stephants, knights, ladies, &c., and after it is Among the best features of the stage and ring performance were the following : Riing over elephants by John Worland and a dezen others, performing stallions, ponies and elephants, four-horse bareback acts of Mile. Cordona and Bert Johnson midair Ledesma on the flying trapesa. Equestrian acts of Orrin Hollis and Don Geronimo Hell, &c. Captain Paul Boyton, the famous swim mer and navigator, gave an exhibition in a pool of water immediately in front of the reserved seats. He had little room, but his performance was very satisfactory and the people were given some idea of what he could do in a large body of water. After the regular circus performance a concert was given in which the attraction was the woman

The proprietors of this show own and man-age the side show themselves, and they have one of the best seen here in a long time. The big attraction is a fine large red cow which has two heads. The elastic akin man continues as popular as ever, and the four Texas giants are a big feature. One of the most important looking freaks is a flashily dressed nan, who is of about medium height, but of the show and falls in love with every girl that comes along. The young lady handles a number of huge and ugly looking anakes, and a man eats, drinks, &c., with his toes There are a number of other curiosities

which go to make a good show. As soon as the show was over on Saturday night the tents were rapidly taken down and in a few hours the whole circus was on board of trains and on the way to York, where it appears to night. It is wonderful with what apidity and system the large tents are taken down and removed to the cars. It is an interesting sight to see the men do their work after night and hundreds of people lingered around the grounds to see this final

James C. Coffee is the name of the skele-ton dude. Miss Ella Carley, a pretty Brooklyn girl, aged 18 years, has brought an action for \$5,000 against the dude. She claims that he tampered with her young affections, deprived her of the company of other gentlemen, and furthermore, under promise of marriage brought about her ruin. He was served with the papers while on exhibition in the side show in Brooklyn, a few days ago. Coffee, who is 35 years of age, and has been exhibited all over the United States, denies the allegation, and pronounces it a blackmailing scheme. He boasts of filriations with five hundred girls, but none has ever carried things so far as the charmed 18year-old Eila. He will produce numberless

letters in his defense, some of a very spley Contract Awarded. The school board committee on buildings and grounds met at the office of John I. Whenever large crowds of people come to Lancaster on the Pennsylvania railroad, William Brady, chief of the railroad police force, places his men on the different trains which leave this city. This is done for the purpose of protecting people from thieves, and to prevent disorder. On Saturday night at 11 o'clock a special train left this city for Harrisburg, by way of Mt. Joy, and Othese risburg, by way of Mt. Joy, and Officer Wash C. Pyle was assigned to duty on it. While the train was yet in the Lancaster station Officer Pyle noticed a crowd of drunken young men, who were in-clined to be noisy and for fight. After the train pulled out the officer went into the second car and found the young fellows fighting He succeeded in quieting them and then went back to the third car where there was more disorder. He tried to stop it and just so be had restored quietness some of the men, who had been in the second car, came back. One of them walked up to Pyte said "There is the s---He drew a black seck and struck Pyle a terrible blow above the right eye, knocking him down. Before the trains again started, however, the companions of the man under arrest jumped from the car. They again knocked Pyle down and kicked him and before the officer could re cover they had again boarded the car, taking with them the prisoner on whose wrists the indcutts still were. The officer was pretty badly used up, and although he has a very black eye he is about to-day and will likely bring his assailants to justice. The men are
